## **CONSERVATION COMMENTS**

DATE: March 5, 2010

### **FOR IMMEDIATE RELEASE**

#### *Too much snow?*

Tired of all the shoveling, pushing & snowblowing to get your car on the road this winter? And once you were on the road, dealing with the drifts and single-lane passes to get where you needed to go? Well-planned plantings of trees and, yes, even shrubs and grasses help keep snow off the road and out of your yard. Stop by the Conservation Office in Madison and talk to Les about the trouble spots along the roads you travel. Several programs providing financial assistance may be available for installation of farmstead windbreaks and living snowfences. And of course, planning assistance is always free!
